Summary

Cloud Computing Engineering Student at **ESPRIT** (Double Degree with **Beijing Polytechnic University**). Backed by an international educational exchange program in Xi'an and Yuncheng (China), combining technical expertise in infrastructure automation (Terraform, Ansible), Kubernetes, DevSecOps (Vault), and AIOps with strong cross-cultural agility. Seeking a **6-month End-of-Study Internship in Cloud Engineering, DevOps, or DevSecOps**, starting January 2027.

Technical Skills

Cloud & Virtualization: Microsoft Azure, Azure Container Apps, OpenStack, VMware, Cloud Infrastructure. **DevOps & Infrastructure as Code:** Kubernetes, Docker, containerd, Terraform, Ansible, Argo CD, GitOps, Jenkins, CI/CD, Git, GitHub. **DevSecOps & Security:** HashiCorp Vault, Kubernetes Security, RBAC, IAM, Secrets Management, SonarQube. **Linux & Networking:** Linux, Unix, Bash, Shell Scripting, TCP/IP, System Administration. **Observability & Telemetry:** Elasticsearch, Filebeat, Metricbeat, Kibana, Prometheus, Grafana, Alertmanager. **Programming & Microservices:** Python, Java, Spring Boot, NestJS, Angular, Flask, REST APIs, MySQL, JUnit. **AIOps & Automation:** K8sGPT, Kubewatch, Python Automation, Model Context Protocol (MCP), Gemini AI.

Work Experience

Cloud & DevOps Engineering Intern – Kubernetes Enterprise Platform (KEP)

Jul 2026 – Sep 2026

Platform: Terraform → VMware → Kubernetes HA → Argo CD/GitOps → Vault → ELK → K8sGPT → Gemini AI

- Architected an automated multi-node **Kubernetes HA cluster** on VMware using **Terraform and Ansible**, significantly accelerating platform deployment through full pipeline automation.
- Implemented declarative **GitOps Continuous Delivery** with **Argo CD** to automate production deployments and enable application self-healing workflows.
- Secured 3-tier microservices workloads with **HashiCorp Vault**, dynamically injecting production credentials into RAM (tmpfs) to enforce zero disk footprint and strict secret isolation.
- Centralized multi-node telemetry using an **ELK observability stack** (Elasticsearch, Logstash, Kibana), streamlining incident investigation and log analysis.
- Architected an **AIOps troubleshooting workflow** (Kubewatch, K8sGPT, Python, MCP, Gemini AI) to automate root-cause analysis and reduce MTTR with Human-in-the-Loop validation.

Backend Developer Intern

May 2026 – Jun 2026

3LM Solutions, Tunis, Tunisia

- Engineered high-performance backend REST APIs using **NestJS and Prisma** for a CRM platform, optimizing query latency and data throughput.
- Delivered subcontractor management and invoicing modules, enforcing granular **Role-Based Access Control (RBAC)** and data access policies.

Software Development Intern

Jun 2025 – Aug 2025

ESPRIT, Tunis, Tunisia

- Automated candidate screening and workflow processing using **Power Apps, Dataverse and SharePoint**, streamlining administrative review cycles with Power Automate.

Key Projects

Pour La Forme – Cloud-Native Fitness Platform

Jan 2026 – Jun 2026

Spring Boot, Angular, Kubernetes, OpenStack, Ansible, Azure

- Architected a multi-role cloud-native platform using **Spring Boot and Angular**, enforcing JWT authentication and RBAC for concurrent user access.
- Provisioned private cloud infrastructure using **OpenStack Heat and Ansible**, deploying containerized microservices on **Kubernetes** to maintain high availability.
- Deployed microservices on **Azure Container Apps** and established full telemetry with Prometheus, Grafana and Alertmanager to monitor system health and performance.

Retail Decision Support Platform

Sep 2025 – Dec 2025

Python, Flask, Scikit-learn, Pandas

- Built a predictive Python/Flask analytics platform using **Scikit-learn and Pandas** to process large-scale retail datasets and deliver high-accuracy business forecasts.

Education

Master of Science in Computer Science (Major: Cloud Computing & DevOps)

Expected Graduation: June 2027

ESPRIT, Tunis, Tunisia

Bachelor of Science in Computer Application Technology (Double Degree)

2025 – 2028

Beijing Polytechnic University, Beijing, China

Educational & Cultural Exchange Program

2026

Xi'an University & Yuncheng, China

Integrated Preparatory Program – Mathematics & Computer Science

2022 – 2024

ESPRIT, Tunis, Tunisia

Certifications

CCNA – Cisco, 2025 | Describe Cloud Computing – Microsoft, 2026 | Foundations in Agentic AI – GitHub / Microsoft, 2026

AI Security and Generative AI Red Teaming – NVIDIA, 2026 | Anomaly Detection – NVIDIA, 2025 | Fundamentals of Deep Learning – NVIDIA, 2025

Leadership Experience

IEEE ESPRIT SIGHT – Project Manager

Sep 2025 – Jun 2026

Led a team of engineering volunteers to organize technical workshops and champion humanitarian tech initiatives, reaching the Finalist stage in the Global Tech4Good Challenge.
